Siena Cappuccino

The Siena is packed with features at an affordable price. Standard features include 5 selection buttons, pre-selection for double and grinder by-pass, single step cappuccino, digital display for programming. Thanks to the new CPU-Platform, the Siena offers limitless possibilities for distributors and coffee roasters, taking full control of the programmability and limit access to certain features.

Connect to a PC via RS232 for extended programming (only for distributors)
· Product Button Assignment
· Max Coffee Boiler Temperature
· Max Steam Boiler Temperature
· Tamping Pressure
· Pre-Brew Delay / Amount
· Temperature Compensation
· Accounting System / Prices

Commercial Components

The Brew Group and the high precision adjustable grinder are identical to the ones used in the commercial Ambiente model.

Brew Group

Adjustable Grinder

Cup Warmer

Place the cups on the cup warmer platform to ensure the cups are warm whenever needed.

Double Products

Thanks to the 18g brew group, 2 products can be dispensed in a single brewing cycle. Just push the double button followed by any product button and the Siena will automatically dispense 2 products.

Single Step Cappuccino

The Siena is the only machine in its price class that can dispense foam and espresso simultaneously. The Siena Single Step Cappuccino Solution is truly the most advanced technology.

Options

· The Siena is also available without the single step cappuccino system. Just use the traditional steam arm to foam milk.
· Customized self service panels are available to cover the programming buttons and display your POS graphics and Logo.

1 kg Bean Hopper Extension

The 1kg Bean hopper extension is available with key-lock.
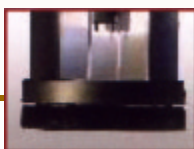

Coin or Token Acceptor

The coin or token acceptor is ideal for self service applications.

Plumbing & Extended Base

The Siena can be plumbed in and hooked up to a drain hose.
